## How To Measure A Fence Post

Take this measurement from the top of the post (not the top of the cap), to the center of the first hole.

Measure this from the center of the $1^{\text {st }}$ hole to the center of the $2^{\text {nd }}$ hole

Measure this from the center of the $2^{\text {nd }}$ hole to the center of the $3^{\text {rd }}$ hole

Measure the width of your post so it can be sized accordingly for your replacement post

## The Order:

Type of fence:
\# of sections or Liner feet

End posts

Corner posts
Line posts
Gate posts
Gates
